

**CONCRETE NEW JERSEY ROAD BARRIER**

**Dimensions of Road Barrier**

*Note: All dimensions are in millimetres.*

VOHUP LEE's concrete new jersey road barriers are commonly used to separate opposing lanes of traffic. They are also used as general barriers during construction projects or while constructing temporary walkways.

VOHUP LEE's jersey barrier is a multistage barrier, providing higher impact angles thus enhancing the safety of road users. It is designed with end butt joints and coupled with a lifting hole at the center of gravity for easy handling, loading and unloading purposes.
